

Agenda at a glance: Automation

K.Sight CLASS: Reimagining your warehouse using 3D Simulation	The Product Manager for the CLASS solution will walk through the applications for CLASS, a demo of the new features including the 3D simulation, value proposition and the roadmap.
Introduction to Körber Supply Chain Automation	Körber Supply Chain Automation designs, delivers and services automated systems including material handling systems. The CSO gives an overview.
KSC AMR update	Körber Supply Chain has made great strides over the past year in its Autonomous Mobile Robotics business area. This session will dig into what we have been doing at KSC Robotics and what our customers can expect over the coming year.
Sponsor session: Twinlode Automation	Twinlode Automation will provide examples on how they can add value to your business from conventional systems to mid level automation to full scale automated systems.
Customer Success Story: Arizona Beverages. A new dimension of operational functionality and insight into accurate inventory.	Arizona Beverages has implemented Körber software into raw material production process and into three manual warehouses. The team of Arizona Beverage will elaborate on this and will also highlight the impending go live of the state-of-the-art ASRS in a new warehouse facility.
Conquering cold chain complexity with AMR - case study of Galipo Foods AMR deployment in the chiller	To effectively shake up the logistics industry, Galipo Foods decided to be the first to deploy Autonomous Mobile Robots (AMR) in a temperature-controlled food service environment. The project represented a brave new frontier in the use of AMR technology.
Automated storage & retrieval systems for pallets	This session is intended to give an overview of the different concepts that Körber can offer for pallet ASRS systems and the latest developments here. Typical references sites in FMCG and Cold Chain will be explained.

Automated palletizing systems

End of line palletizing systems are getting more complex. This session shows how Körber implements high-speed, highly flexible, digitally driven palletizers including all required surrounding equipment.

Round table: automation

This session will feature a panel of customers sharing their use of the solution to support eCommerce business activity with Automation.

Customer success story: Cardinal Tissue. Innovation in the tissue industry

Cardinal Tissue was founded only a few years ago and opened a brand new and modern facility in 2018. The founder Vince Reese will show his facility, will give his view on modernizing this industry and will explain why he chose a technology focused partner (Körber).

K.Sight CLASS: Reimagining your warehouse using 3D Simulation

The Product Manager for the CLASS solution will walk through the applications for CLASS, a demo of the new features including the 3D simulation, value proposition and the roadmap.

Layer picking solutions

Automated Layer Picking Solutions are more and more common in FMCG and Cold Chain as their retail customers demand smaller than full pallet quantities. Körber's VP of Solution Design shows the potential and some typical applications

WCS and PLC automation concepts

Automated material handling systems need a Warehouse Control System and (PLC) Automation systems. Körber's VP Global Technology and Support gives an overview of the Körber offering, also for North America.

Combining autonomous mobile robots with other automation

The use of AMR's is growing, and these solutions have their advantages. At the same time other high-performance/high-density automation solution still have their sweet spot. Körber's VP of Solution Design will show the where each solution fit's best and explores how these technologies can be combined to create new and even more attractive solutions. One and One can really be three in this case!
