Virtual
User conference
March 8-12, 2021

**Partner session:
Bartender and
Körber Supply
Chain**

About Bartender: The world's most trusted software for labels, barcodes, RFID tags, plastic cards, serialization, traceability, compliance and security. Our company has over 30 years of rich history in barcode label design, printing and programming labels and leveraged by top supply chain organizations around the world.

**Screen to Voice
for K.Motion
Warehouse Edge**

Short recap on what is screen to voice and heres what's now possible with V3.

**1+1=3: The power of
combining voice
and autonomous
mobile robotics**

Within a distribution center (DC), the future lies in flexible automation – technology that can adapt over time for changing requirements and needs. This applies to DC automation as a whole with voice technology and autonomous mobile robots (AMRs) leading the way in terms of scalability and adaptability.
